EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Hess on November 17, 2006.

The application has been amended as follows:

In claim 1, line 11-

“barrier against exposure of the aspiration tube to contamination.”

has been changed to

--barrier against exposure of the aspiration tube to contamination, the sterile tubular sheath being secured to either an end of the aspiration tube in close proximity to the port, or the port of the console.--

In claim 2, line 5-

“cassette than the distal end of the aspiration tube, the location where the sterile,”

has been changed to

--cassette than the distal end of the aspiration tube, a location where the sterile,--

In claim 5, line 1-

"A sterilized barrier apparatus of claim 1, wherein the surgical"

has been changed to

--A sterilized barrier apparatus of claim 1, wherein a surgical--

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the subject matter of the independent claim could either not be found or was not suggested in the prior art of record. The subject matter not found was a sterile tubular sheath, an extension tube, an instrument console with surgical pack including an aspiration tube, the sterile tubular sheath being secured at one end to the extension tube and the other end at either the console port or the aspiration tube near the port, substantially as claimed.

3. The closest prior art of record is US Patent Number 5,741,226 issued to Strukel et al. Sturkel discloses a Phacoemulsification Handpiece, Sleeve, and Tip. Strukel does not disclose the collapsible sleeve connected to or near either the aspiration tube or port, and further is not connected to the extension tube. Strukel's sleeve teaches away from the current invention by not enabling reuse of the aspiration needle without the need for sterilization. Strukel does not disclose a sterile tubular sheath, an extension tube, an instrument console with surgical pack including an aspiration tube, the sterile tubular sheath being secured at one end to the extension tube and the other end at either the console port or the aspiration tube near the port, substantially as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
